PROFESSIONAL SUMMARY

Full-stack software engineer building and maintaining a multi-tenant SaaS learning platform (LMS) across React/TypeScript, .NET (MVC/Core), and SQL Server. Owns work end to end — SPA re-architecture, unit testing, manual deployment, and client onboarding — and presents directly to client leadership. Builds AI-assisted development workflows with guardrails that keep AI-generated code controllable. Analytical background in Applied Mathematics and Physical Sciences (NTUA).

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C# (.NET), SQL (T-SQL), Python, R, HTML5, CSS3

Frontend: React, React Router v6, Vite, Vitest (unit testing), Responsive/Mobile UX, PWA

Backend: .NET MVC/Core, REST APIs, JWT/OAuth, Keycloak (RBAC), GraphQL

Data & Infra: SQL Server, IIS/Windows Server, Docker, Git, CSP/security hardening

AI Workflows: Rules-based AI code governance, agentic dev (Claude Code, Copilot, Cursor, Antigravity)

Practices: Multi-tenant architecture, PR review & mentoring, manual deployments & client onboardings, UAT authoring

EXPERIENCE

FlexLearn Business Solutions — Software Engineer, Athens

Dec 2025 – Present

Multi-tenant SaaS learning platform (React/TypeScript, .NET Core, SQL Server, IIS)

- Migrated the student application from a Razor/React hybrid to a full **React Router v6 SPA**, and contributed on a **runtime config system** decoupling per-client configuration from Vite builds.
- Fixed cross-tenant backend issues in **.NET/SQL Server** — JWT claim emission, FK constraint violations, and notification-state bugs — across separately deployed client instances.
- Built a **rules-based automation system to govern AI-assisted code changes** — adding controlled feedback flows that made AI output reviewable and safe to integrate.
- Authored the complete **unit-test suite** for the React application with **Vitest**, establishing test coverage across the codebase.
- Administered multi-client **IIS** deployments: hardening scripts, per-site CSP frame-ancestors, HLS video delivery, and SQL Server backup/restore and data-remediation operations and **deployed manually** the applications on the IIS.
- Reviewed PRs, mentored teammates, and led adoption of AI coding assistants for a 5-person team, including a manager-facing procurement evaluation.
- Presented the platform to several clients' Heads of HR and also trained them on how to use the platform. Alongside that I created user manuals and UAT documents for non-technical staff.

UniSystems — Software Engineer Intern, Athens

Jul 2023 – Sep 2023

- Developed React front-end components and integrated **Keycloak** for authentication and role-based access control (RBAC).

PROJECTS

Hiring App (prototype)

- Full-stack web app connecting job seekers with employers; user auth, search filters, responsive design, packaged as an Android APK with Capacitor. Stack: React, Supabase, JavaScript, Android Studio.

Wedding Website (in maintenance and development)

- Firebase-hosted site with Cloudinary photo gallery, DB security rules, and RSVP handling; built via an AI-assisted workflow

Thesis — Interactive Educational Website on Black Holes

- Designed an HTML/CSS/JavaScript educational site explaining black hole physics, combining scientific visualization with an intuitive UI.

EDUCATION

Integrated Master's in Applied Mathematics and Physical Sciences

2025

National Technical University of Athens (NTUA) — equivalent to a 5-year MEng program

CERTIFICATIONS & LANGUAGES

Certifications: Prompt Engineering & Programming with OpenAI (Columbia University) • Get Started with Microsoft Fabric (Microsoft Learn) • Certificate of Completion on Claude 101

Languages: Greek (Native) • English (C2) • German (B1)

Highlights: ReGeneration Finalist — 20th Cycle (2025) • Fulfilled military obligations (2025)
